

Continuing Medical Education &  
Department of Surgery Presents

## Trauma Program Grand Rounds

# Avoiding Iatrogenic Resuscitation Injury after Traumatic Brain Injury: Repairing the Blood Brain Barrier

**John Holcomb, MD, FACS**

*Professor of Surgery  
University of Alabama, Birmingham*

Tuesday, April 28<sup>th</sup>, 2026

7:00 – 8:00 am

Medical Science Building – Auditorium 6120

and via Zoom

<https://ufhealth.zoom.us/j/95529294073?pwd=KsacEbi2LJOuhk0fcbWfz3jxkzfpMa.1>

### LEARNING OBJECTIVES:

This lecture describes the benefits and harms of current resuscitation practices for patients with isolated TBI.

Upon completion of this activity, participants will be able to:

1. describe the impact of standard therapy on brain edema after injury.
2. discuss use of plasma as a primary resuscitation fluid for patients suffering isolated TBI
3. discuss the harms found with crystalloid as a primary resuscitation fluid for patients suffering isolated TBI

### ACCREDITATION:

The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

### CREDIT:

The University of Florida College of Medicine designates this live activity for a maximum of 1.0 *AMA PRA Category 1 Credit*<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
