Clinical Activities

R Adams Cowley Shock Trauma Center

1998 - Present

Attending Trauma Surgery

- Lead a clinical team caring for acutely and severely injured trauma patients on a weekly basis
- Provide assessment and treatment on admission approximately 60-90 new assessments weekly
- Provide operative management of emergent and non-emergent problems related to injury
- Provide follow up care throughout the hospitalization (approximately 35 inpatients daily) and in the outpatient setting

Critical Care Surgery Attending

- Lead a team caring for critical injured patients managing ventilator and hemodynamic problems related to injury, illness or sepsis

2001 - Present **Director Wound Healing and Metabolism Service**

- Created to provide care to patients with complex soft tissue infections and wounds to facilitate the provision of multidisciplinary care to these difficult patients
- Provide oversight for the service
- Manage four nurse practitioners
- In-patient management of 15-20 patients daily
- Surgical care including debridement and reconstruction, tracheostomy and feeding access as well as abdominal wall reconstruction and enterocutaneous fistula management
- This is a labor-intensive time demanding service and 80 – 90 hours a week is not uncommonly spent providing clinical care to these patients
- I placed the first negative pressure wound therapy dressing on a patient in this hospital, it is now a ubiquitous practice
- Provide consultative services to in-patients at the University of Maryland Medical Center
- Receive patients in transfer from local, regional and national referrals
